

Through Hole Soldering Operator

About NOTE Windsor

NOTE Windsor (NWI) celebrated 40 years of manufacturing in 2023. Born out of a PCB fabricator NWI started electronics manufacturing in Windsor in 1988. The factory was acquired by NOTE in 2018 and had its best year on record in 2023, reaching £24M of sales and on target operating profits.

NOTE has also acquired two other sites in the UK in recent years. Therefore, with four factories and over £50M sales, NOTE UK is now a formidable electronics manufacturing company **turning product ideas into reality** for our customers.

Job Role:

Reporting to the Through Hole Supervisor you will be part of a team of technicians & solderers who will be responsible for all aspects of conventional Through Hole soldering and assembly. On occasion you will be required to support other activities within production including inspection.

Candidates must be able to demonstrate soldering aptitude through our trade test and once successful achieve high levels of output & quality in equal measure. Excellent tactile proficiency with small components will be essential.

Responsibilities:

- Hand soldering
- Kit preparation
- Continually monitor the process to ensure perfect quality and productivity
- Read and interpret Drawings, Diagrams and Bills of Materials
- Maintain high housekeeping standards
- Basic computer skills (using our QL system to barcode work from the department)
